## IMPORTANT REMINDERS

### Coming Soon!

Nominations open later this month for the Board of Directors and Trainee Representative positions, the SSR Major Awards, and the SSR Distinguished Fellowships! An important function of the Society for the Study of Reproduction is to recognize individuals who have made outstanding contributions to the industry and to recommend fellow SSR members who would be outstanding leaders of our society. Stay tuned for more details on how to submit your nominations and help recognize excellence in our society.

## 57TH ANNUAL MEETING RECAP

### 57th Annual Meeting Offers New Scientific Insights and Industry Connections for Reproductive Biology Community

The Society for the Study of Reproduction (SSR) met for the first time outside North America in Dublin, Ireland from July 15-19, 2024. More than 925 scientists from 36 countries were represented at its 57th Annual Meeting, featuring sessions ranging from pre-conference workshops to thought-provoking keynotes, focus sessions, poster presentations and networking opportunities for attendees. EPIC, The Irish Immigration Museum, offered a historical backdrop for attendees to connect at the Welcome Reception, in addition to committee meetings, trainee mixers and closing banquet throughout the week.

Plenary session topics included mapping the development and regeneration of reproductive tissues, the reconstitution of germ cell lineage and gonadal environment using pluripotent stem cells, an engineered cohesion system reducing errors in aged mammalian eggs, live-imaging the preimplantation embryo, epigenetics: a game-changer in livestock production, and more.

[Cryptorchidism and testicular cancer in the dog: unresolved questions and challenges in translating insights from human studies](#)

In this review, Sandra Soto-Heras and colleagues explore the relationship between cryptorchidism and testicular cancer in dogs, revealing specific gaps of knowledge and limitation of bridging perspectives from human studies.

[Microwave-assisted dehydration, long-term storage at non-freezing temperatures, and rehydration of cat germinal vesicles](#)

Pei-Chih Lee and Pierre Comizzoli provide a detailed protocol for microwave-assisted dehydration of GVs to allow fertility preservation and long-term storage at supra-zero temperatures.

## INDUSTRY NEWS

### Registration Open: Magee-Womens Summit

*Join for a Conversation Focused on the World of Women's Health*

This November 13 and 14 in Pittsburgh, top scientists, researchers, clinicians, hospital administrators, public health advocates, and industry leaders will gather for two days of talks surrounding the world of women's health. [Join in person or virtually](#) for the Magee-Womens Summit — a groundbreaking exchange of ideas to bring women's health research to the forefront of scientific inquiry.

## Connect with SSR

**About SSR:** The Society for the Study of Reproduction (SSR) was founded in 1967 to promote the study of reproduction by fostering interdisciplinary communication among scientists, holding conferences, and publishing meritorious studies. Today, our members come from 50 countries around the world.
