BOR EDITOR'S CHOICE

The Future of Reproductive Biology: Insights and Innovations from Europe — Now Available in *Biology of Reproduction*

To mark the Society for the Study of Reproduction's first annual conference in Europe (Dublin, 2024), *Biology of Reproduction* has published a special issue, **The Future of Reproductive Biology: Insights and Innovations from Europe**, edited by Norah Spears and Stefan Bauersachs. Featuring 10 articles from leading European researchers, the collection spans cutting-edge advances in germ cell biology, embryo development, reproductive health, and clinical research—including endometriosis and ovarian aging—highlighting emerging technologies, translational discoveries, and the growing importance of international collaboration in shaping the future of reproductive science.

SSR ANNOCEMENTS

Congratulations Janice Bailey, SSR Past President

Ms. Janice Bailey, Past SSR President, Vice President Research - Scientific Direction in the Nature and Technologies sector of the Fonds de Recherche du Québec, has been named a Knight of the Order of Academic Palms.

Handing over to the Residence de France by the Consul General of France in Québec, M. Eric Lamouroux, this distinction salutes a remarkable path and a constant commitment to open, inclusive research and at the service of the common good.

Specialist in Reproductive Biology, Mrs. Bailey has built bridges across disciplines, institutions, and generations, leveraging science to address climate and biodiversity challenges.

A distinction that highlights its remarkable contribution to science and international scientific cooperation.

EP52: Carl G. Hartman Award with Dr. Teresa K. Woodruff

It's a mini lab reunion! Yu-Ying Chen and Shuo Xiao interview their former mentor, Dr. Teresa Woodruff, at the SSR Annual Meeting. Dr. Woodruff, the recipient of the 2025 Carl G. Hartman Award, looks back on her career, sharing the personal story behind her biggest scientific milestones and her fierce dedication to advocacy. Hear her advice on taking "high risk" projects, what she learned from industry, why she loves teaching (from first grade to postdocs), and how a conversation by the beach led to the discovery of the zinc spark. This episode captures the profound impact of mentorship and the passion that drives a truly extraordinary career in reproductive science.
